

NACE COMPLIANT PRESSURE RELIEF VALVES

The Lee Company's new field proven .281 inch diameter Pressure Relief Valves are made with materials specifically chosen for optimal performance in harsh duty applications, such as those in the oil tool industry. These new high speed, direct acting valves are constructed entirely of corrosion-resistant materials that are compliant with NACE specification MR0175/ISO 15156.

Standard valves are available in forward and reverse flow directions with cracking pressures from 80 to 5900 psid. Custom models are also available with cracking pressures as high as 12,000 psid. Each Lee pressure relief valve is 100% tested and inspected to ensure reliable consistent performance. Contact your local Lee Sales Engineer for additional information and technical assistance.

- All Valve Materials Compliant with NACE MR0175/ISO 15156
- Materials Used:
 - MP35N
 - 316L
 - Elgiloy
- Standard Cracking Pressures from 80 to 5900 psid

.281 PRI[®] (up to 3000 psi system pressure)

Screened .281 PRI[®] (up to 3000 psi system pressure)

High Pressure Screened .281 PRI[®] (up to 5000 psi system pressure)

* Leakage at Minimum Cracking Pressure & Minimum Shutoff Pressure: 1 mL/Minute Maximum.

** The Lohm is a measure of flow resistance. Example: One Lohm will permit a flow of 100 GPM of water at 25 psid at 80° F. Additional information can be found at www.TheLeeCo.com.

† All valves thoroughly cleaned to remove Lee test fluid.
